Art Unit: 1778

The following is an examiner's statement of reasons for allowance: Claims 10-17 and 19-22 remain distinguished in view of recited crystallizer adapted to receive concentrate withdrawn from the pressure vessel and membrane. Dyke patent 6,054,050 is now cited to show a form of crystallizer to receive concentrate withdrawn from a reverse osmosis membrane , with intermediate evaporator. However, it is deemed not obvious to modify the Wheatley system, formerly applied against the claims, by incorporating such crystallizer, since Wheatley discloses objective of using crystallizing concentrate solids to obtain commercially valuable fertilizer and metal products, whereas Dyke teaches crystallization in order to dispose of concentrated solid product to disposal. Also, it would not be apparent to combine the concentrate water portion of Wheatley with the permeate, as is done in Dyke, since the backwash concentrate of Dyke is routed to a decant pit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
